*Want to insure teenagers' attendance when creating a library space for their use? Invite them to get directly involved in the process.*

*The lighting fixture choices for the Phoenix Public Library Teen Center were approved by a committee of teens in order to create a comfortable, hip, and stimulating space.*

*Colored fiber optics float throughout, decorative fixtures bring focus to intimately scaled "break-out" areas, and accent lighting highlights the bookshelves and specific points of destination. Throughout, HLB kept the existing 2x4 fluorescent troffers to save costs and equipped them with gels to add a colorful splash.*

*In the auditorium, HLB used recessed low voltage fixtures with sparkling glass trims for both general lighting and for softly illuminating the curved wood ceiling. The stage is lit for special "party" events via decorative low voltage accent lights.*
