

Sustainable design means "meeting the needs of today without compromising the needs of future generations."

—Gro Harlem Brundtland

Lee Hanel LC / Associate

"I was a nerd in school - I loved math. When I found out I could mix this love with my passion for art, design and architecture in college - I was thrilled. Architectural engineering and lighting design have enabled me to use all of the above in creative and challenging ways. I really enjoy coming to work every day."

200 Park Avenue South, Ste. 1401  
New York, NY 10003

Razzle and dazzle are the eye candy of lighting. But there is the practical side too! I get inspired creating solid design solutions that are responsible, sustainable and functional. Since joining the firm I have promoted sustainable design because I believe in our future.
